

# WM-5000V8 Guard Tour system

## Strong Body

Three layers Protection. No screw on the surface, let Vanguard 8 more sturdy.

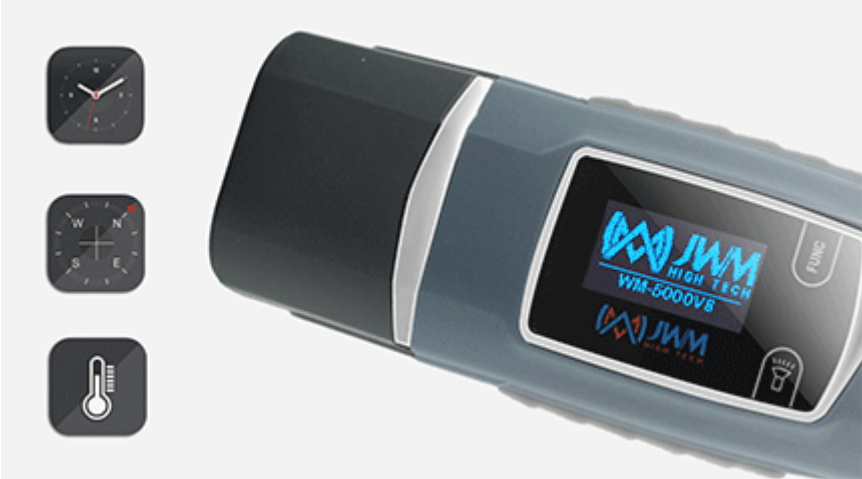

## Distinctive Design

Innovative gilded contact USB design, make the reader get to IP67.

All for customers

Superior suppliers provide us the most reliable quality.  
We only provide you the less service to keep your maximal profit.

**More surprise**  
One intelligent Reader which can show Time, Temperature and Compass.

**Lighten the night**  
One reader that can shine 20m to 30m  
let you throw the flashlight away.

**Personal Tailor**  
We can make the Boot interface as your choice.

## The intelligent download Station

You can input the checkpoint information to the software by the download station itself. That makes your installation highly active.

## One Charge for 20 days using

Vanguard 8 chooses high-capacity battery and low power consumption design. That guarantees the super endurance.

## Wider Market

125Khz and 2.4G Reading mode, let your application more extensive.

## Easy Operation

Only five steps, makes your installation easily.

## Efficient Management

The software provide every report you want.  
That makes your management more efficient.
